

A car or truck's vehicle identification number is required by federal regulation to contain specific information in code. Break the code and you can verify key facts about the vehicle. The U.S. government standardized the 17-character format for the 1981 model year for cars and light trucks sold in the USA. VINs for commercial-use and heavier-duty vehicles use a slightly different formula.

**Sample vehicle identification number (VIN)**

|   |   |   |   |   |   |   |   |   |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |     |
